**NOTES ON DD S&T STAFF MEETING - 18 June 1964**

25X1A

25X1A

Prior to Dr. Wheelon's Staff Meeting this morning Bob Chapman asked me if we were busy on [ ] He says he is being pressured by DDP to get a guy over and get things done, etc. ORD has been directed by DD/S&T to stand down on [ ] and Chapman feels that what they want to do is secondary anyway. This was news to me, but it sounded a little wedgy.

The other significant item pertains to fishing on account of a 24 foot blue whale showed up dead off Alaska carrying a transmitter and a radar reflector. We have retrieved the electronics and it is of Russian make, and I understand that Chapman is pushing for an autopsy on the whale. The question to be resolved apparently - are they really fishing for fish only.

25X1A

[ ] will be in Friday and Wheelon will brief him on how we stand on manned aircraft. OSI will make a heavy input on the vulnerability aspects.
